SECTION 4. FIRST AID MEASURES

General advice: Move out of dangerous area. Consult a physician. Do not leave the victim unattended.

If inhaled: If unconscious place in recovery position and seek medical advice.

In case of skin contact: Immediate medical treatment is necessary as untreated wounds from corrosion of the skin heal slowly and with difficulty. If on clothes, remove clothes. Wash off immediately with plenty of water for at least 15 minutes. Wash contaminated clothing before re-use.

In case of eye contact: Small amounts splashed into eyes can cause irreversible tissue damage and blindness. Continue rinsing eyes during transport to hospital. Remove contact lenses. Protect unharmed eye. Keep eye wide open while rinsing. If in eyes, rinse with water for 15 minutes.

If swallowed: Clean mouth with water and drink afterwards plenty of water. Keep respiratory tract clear. Never give anything by mouth to an unconscious person. DO NOT induce vomiting unless directed to do so by a physician or poison control center. Take victim immediately to hospital.

SECTION 5. FIREFIGHTING MEASURES

Suitable extinguishing media: Alcohol-resistant foam
Carbon dioxide (CO2)
Dry chemical

Unsuitable extinguishing media: High volume water jet

Specific hazards during firefighting: Do not allow run-off from fire fighting to enter drains or water courses.

Hazardous combustion products: Carbon dioxide (CO2)
Carbon monoxide
Smoke
Nitrogen oxides (NOx)

Specific extinguishing methods: Use extinguishing measures that are appropriate to local circumstances and the surrounding environment.

Further information: Fire residues and contaminated fire extinguishing water must be disposed of in accordance with local regulations. For safety reasons in case of fire, cans should be stored separately in closed containments. Use a water spray to cool fully closed containers.
Special protective equipment for firefighters

Wear self-contained breathing apparatus for firefighting if necessary.

### SECTION 6. ACCIDENTAL RELEASE MEASURES

| Personal precautions, protective equipment and emergency procedures | Use personal protective equipment.  
| Ensure adequate ventilation.  
| Remove all sources of ignition.  
| Evacuate personnel to safe areas.  
| Beware of vapours accumulating to form explosive concentrations. Vapours can accumulate in low areas. |

| Environmental precautions | Prevent product from entering drains.  
| Prevent further leakage or spillage if safe to do so.  
| If the product contaminates rivers and lakes or drains inform respective authorities. |

| Methods and materials for containment and cleaning up | Soak up with inert absorbent material (e.g. sand, silica gel, acid binder, universal binder, sawdust).  
| Sweep up or vacuum up spillage and collect in suitable container for disposal. |

### SECTION 7. HANDLING AND STORAGE

| Advice on safe handling | Do not breathe vapours/dust.  
| Avoid contact with skin and eyes.  
| For personal protection see section 8.  
| Smoking, eating and drinking should be prohibited in the application area.  
| Take precautionary measures against static discharges.  
| Provide sufficient air exchange and/or exhaust in work rooms.  
| Dispose of rinse water in accordance with local and national regulations. |

| Conditions for safe storage | BEWARE: Aerosol is pressurized. Keep away from direct sun exposure and temperatures over 50 °C. Do not open by force or throw into fire even after use. Do not spray on flames or red-hot objects.  
| No smoking.  
| Keep in a cool, well-ventilated place.  
| Observe label precautions.  
| Electrical installations / working materials must comply with the technological safety standards. |

| Materials to avoid | Do not store near acids. |

| Storage temperature | 4.4 - 49 °C |
